

## Long range radio remote

+  SmartPhone App

- Can be supplied with any Spring V11 controller

- Long range radio remote control

- Buildings are no longer an obstacle

- Supplied with rugged, water resistant fob

- Control your system from phone, fob or controller

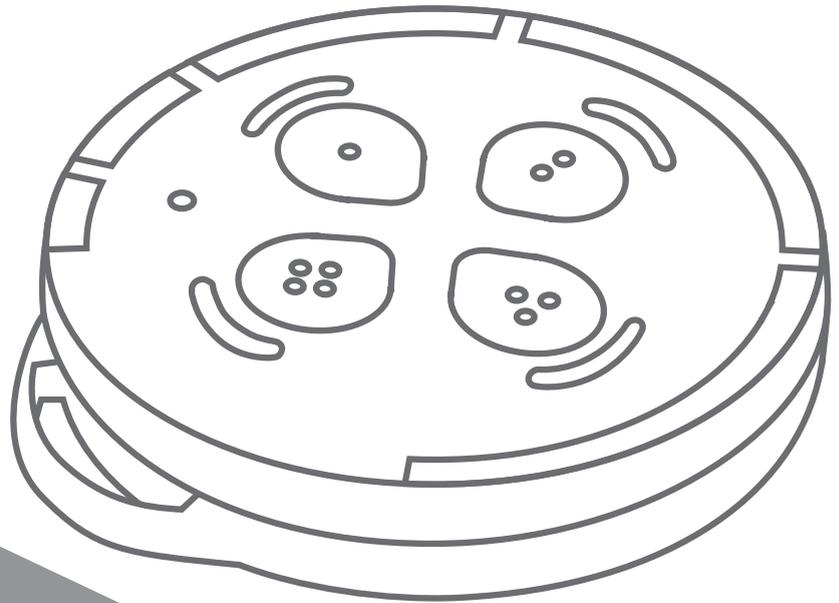

- Configurable fob button controls

This controller is Spring's most advanced radio remote. It will provide long range radio control of your system without the need to return to your vehicle to adjust your controller. This remote also connects your phone to your system via an app. This app allows you to use all the functions on your controller such as on, off, increase or decrease flow etc. It also allows you to create different settings for different poles.

## Long range radio remote
